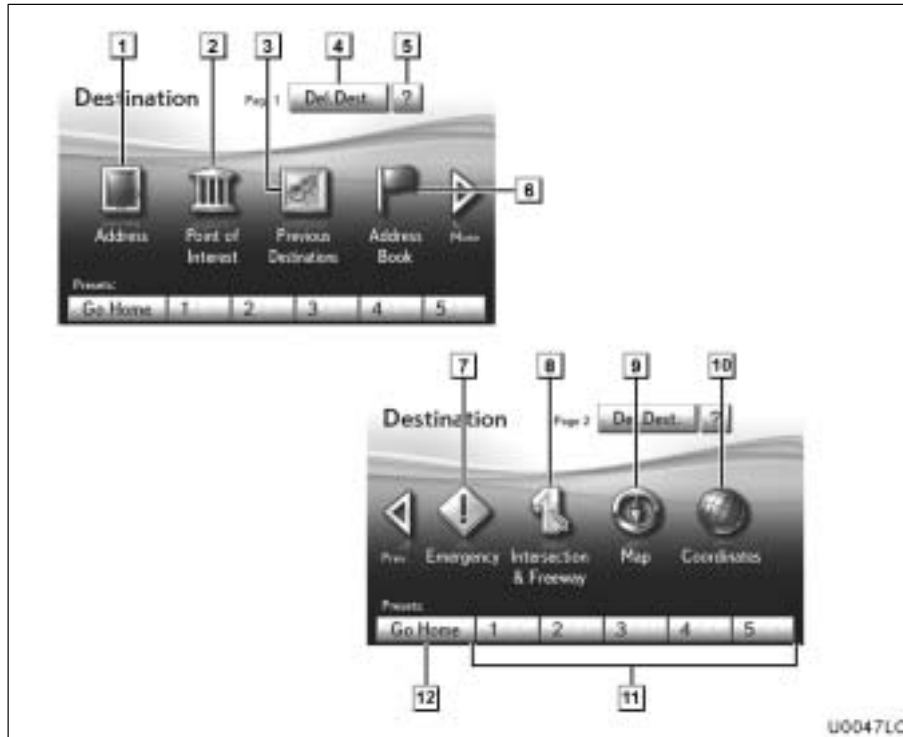
Quick reference (“Destination” screen)

The “Destination” screen allows you to search for a destination. To display the “Destination” screen, push the **“DESTINATION”** button.


1 **“Address”**

A house number and the street address can be input by using the input keys. 65

2 **“Point of Interest”**

Select one of the many Points of Interest that have already been stored in the system’s database. 69

3 **“Previous Destinations”**

A destination can be selected from any of the last 100 previously set destinations and from the previous starting point. 75

4 **“Del. Dest.”**

Set destinations can be deleted. 81

5 **“?”**

Function help for the “Destination” screen can be viewed on this screen. 34

6 **“Address Book”**

The desired location can be selected from a registered entry in the “Address book”. (To register address book entries, see “(a) Registering address book entries” on page 119.) 76

7 **“Emergency”**

One of the four categories of emergency service points that are already stored in the system’s database can be selected. 76

8 “Intersection & Freeway”

The names of two intersecting streets or a freeway (interstate) entrance or exit can be entered. This is helpful if only the general vicinity, not the specific address, is known. 77

9 “Map”

A destination can be selected simply by touching the location on the displayed map. 80

10 “Coordinates”

A destination can be set using latitudes and longitudes as coordinates. 81

11 Preset destination buttons

One of 5 preset destination points can be selected by touching the screen directly. If a preset destination point has not been registered, a message will be displayed and the setting screen will automatically appear. To use this function, it is necessary to set the “preset destination”. (To register a “Preset Destination”, see “(a) Registering preset destinations” on page 116.) 64

12 “Go Home”

A personal home address can be selected without entering the address each time. If “Home” has not been registered, a message will be displayed and the setting screen will automatically appear. To use this function, it is necessary to set a “Home” address. (To register “Home”, see “(a) Registering home” on page 113.)
